Mobile Link™

**Mobile Link** cellular remote monitoring lets you get and share information about your home standby generator no matter where you are, using your computer, smart phone, or mobile device. View your generator's status and maintenance needs. Set its exercise schedule. Review its running and maintenance history. And get notified of status changes. The Mobile Link device can be installed in minutes. Because it sends data via cellular network, it's easier to configure and more reliable than the Ethernet and telephone connections found in many competitive remote monitoring solutions.

## Your Generator's Information, at Hand and in One Place

### DISPLAY

The color-coded background gives you at-a-glance information about your generator.

- **Green:** Your generator is ready for action.
- **Blue:** Your generator is currently running.
- **Yellow:** Your generator needs maintenance, but is otherwise ready to run.
- **Red:** Your generator has a problem, and needs immediate service.

### SUPPORT FOR MULTIPLE GENERATORS

If you have multiple generators, you only have to scroll left and right to select them.

### CELLULAR LINK STATUS

If for some reason your generator isn't connected to the cellular network, an icon will appear to let you know.

### ALERTS

When your generator has a problem, you can click on alert icon to find out the details.

### GAUGES

This instrument cluster shows total generator running time, battery voltage, generator output voltage and frequency, and fuel level in diesel-fueled generators.

### GENERATOR DETAILS

Click here for generator details, like serial number and description, maintenance and status history. If you select a preferred servicing dealer, their info will be available, and you can click to call them.

On your way to the airport, you see your generator needs maintenance. You click to call your preferred servicing dealer to make an appointment while you're away.

You're glad to be on the beach, because you hear there's a big storm back home. One glance at Mobile Link tells you that your generator is running—protecting your home—because the power went out.

During that long business meeting, Mobile Link tells you that your generator is ready to protect your family at home if the power goes out.

From your hotel, you get notifications that your generator is exercising as it should.

At dinner with friends you see that there's a problem with your generator. You click to call your dealer to have it fixed before the next power outage.

Your parents are impressed with how easy it is to monitor your generator. They'd like one just like yours. You use Mobile Link to give them the model number, and put them in touch with your dealer.

## Compatible Units

- 2008 Air-cooled units with LCD display
- Units using a Nexus™ or Evolution™ controller
- Synergy™ and PowerPact™ units
- US/Mexico/Canada only
- NOT available for CorePower™ or EcoGen™ units

Model 006478-0, Harness adapter kit, is recommended for use with liquid-cooled units up to 60kW and required for generators 70-150kW.
